

## Boost your sales with the **NEW adjustable height** retractable banner display

### A visual impact in just a few steps.

Sleek design, with the sprint pole option, allowing your graphic to range from 39" in height up to 90". The new duo.set is your ultimate choice for your visual communication.

The newly designed duo.set is self-contained in a sturdy textured aluminium casing for transport and storage. The graphic is well protected, rolled-up inside the casing.

The assembly of the duo.set is reduced to the minimum. Graphic exchanges are made easily with the sliding connection on the leader tape (ECI – Easy Change of Image system).

Simply pull out and secure with the pole, slide on the new graphic, and you are ready to go. By using the sprint adjustable ring you can add a 2<sup>nd</sup> graphic for double-sided appeal.

\*Second graphic will have to be removed by hand and will not retract into the casing. Front graphic only will be retractable.

5

1. The "NEW" duo.set retractable banner system is designed in a textured aluminium casing and features a twisting and self-locking stabilizing foot for perfect stability.
2. The 3-tier sprint pole adds flexibility in height (from 39" to 90") and ease of use to the duo retractable family. Thanks to a new head, it ensures a perfect holding of the graphic.
3. Insert the pole in the specific pocket inside the casing to protect from damage or scratching.

4. Graphic exchanges are a snap with ECI (Easy Change of Image): the slider bar on the leader tape connects to the graphic on the top and bottom. This allows multiple graphic exchanges with one display.
5. The head of the pole offers single or double-sided graphic capability. By adding the duo adjustable sprint ring you can secure a 2<sup>nd</sup> graphic.

It is possible to add lights to the pole to make sure your graphic's visibility will be at its best.

It is not a luxury to count on **THE ORIGINAL duo.set!**
